LENNOX

HOME COMFORT SYSTEMS
Innovation never felt so good.™

Dave Lennox Signature® Collection XPG15 Dual-Fuel Heat Pump

Innovation never felt so good.™

Patented SilentComfort™ technology provides smooth, quiet cooling and heating

Dedicated dual-fuel option provides cost savings and environmental benefits:

- Helps lower wintertime utility bills and offsets fuel costs
- Helps minimize environmental impact, compared to traditional heating systems

Defrost control enhances comfort, virtually eliminating the “cold blow” that can sometimes occur with dual-fuel heating

Optimized for use with the ComfortSense® 7000 or 5000 Series touchscreen thermostats

R410A refrigerant meets the EPA’s most stringent guidelines (2010 compliant)

ENERGY STAR® qualified

EFFICIENCY RATING

Up to **16.20 SEER** (Seasonal Energy Efficiency Ratio) and **9.20 HSPF** (Heating Seasonal Performance Factor).

WARRANTY**

10-year limited warranty on the compressor and all remaining covered components.

**Applies to residential applications only. See actual warranty certificate for details.

THE QUIETEST HEAT PUMP YOU CAN BUY,* OPTIMIZED FOR DUAL-FUEL PERFORMANCE

The XPG15 heat pump with dedicated dual-fuel technology delivers the right amount of comfort, right when you need it. Electric cooling in the summer. Efficient electric heating during fall and winter months. Gas heating when you need extra warmth. Intelligent switching from electric heat pump operation to gas furnace heating ensures maximum comfort and efficiency year-round.

HOW IT WORKS

Cooling Mode – Functions like an air conditioner

The XPG15 is an all-in-one cooling and heating system. During summer months, it works like an air conditioner. It pulls heat from the air inside and pumps it outside.

Heating Mode – Collects heat from the air outside

When the weather’s cooler, the process is reversed—the system collects available heat from the air outside and moves it inside your home. Instead of burning fuel to make heat, it uses electricity efficiently to draw heat from outside.

Dual-Fuel Operation – Delivers the ideal combination of comfort and efficiency

During winter months, the XPG15 heat pump works with a high-efficiency gas furnace to provide money-saving comfort. Whenever the weather becomes too cold for the heat pump to operate efficiently (at or below 32°F), the furnace automatically takes over to provide the warmth you need.

Lennox’ dedicated dual-fuel technology allows the system to alternate seamlessly between gas and electric heat, making the most efficient use of fuel sources based on outdoor conditions. You can enjoy improved comfort and energy savings year-round.

*Air conditioners/heat pumps have sound ratings established per ARI’s test standard: ARI 270. Size for size, as a product family, these heat pumps have the lowest published sound ratings of any major U.S. brand of air conditioning/heat pump equipment.

OUTSTANDING FEATURES FOR EXCEPTIONAL COMFORT AND EFFICIENCY

SilentComfort™ Fan Grille –

Uses patent-pending, vortex-suppression technology to reduce sound of airflow exiting unit.

Exclusive “Natural Defrost” Control –

Helps prevent frost buildup on the outdoor coil, improving efficiency and comfort.

Precision-Balanced, Direct-Drive Fan –

Delivers ultra-quiet operation with a patent-pending fan design.

Dependable Scroll Compressor with SilentComfort Technology –

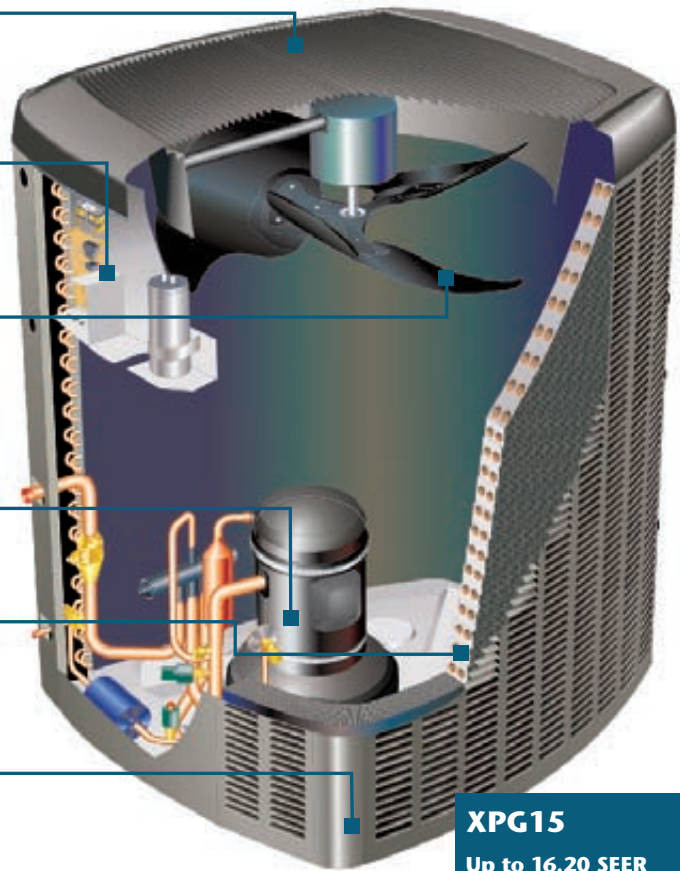

Provides smooth, efficient and reliable operation.

High-Efficiency Outdoor Coil –

Provides exceptional heat transfer and low air resistance for high-efficiency operation.

Durable Steel Cabinet –

Made to last with superior high-quality, pre-painted steel and textured finish. Tested to withstand the harshest environments.

XPG15

Up to 16.20 SEER and 9.20 HSPF

The quietest heat pump you can buy* optimized for dual-fuel performance

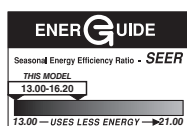

Dedicated technology allows seamless changeover from electric heat pump operation to gas furnace heating, ensuring maximum comfort and energy efficiency.

Note: Due to Lennox' ongoing commitment to quality, all specifications, ratings and dimensions are subject to change without notice.

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR® criteria. Ask your Lennox dealer for details, or visit www.energystar.gov.

- 1 Air conditioner or heat pump
- 2 Thermostat
- 3 Furnace or air handler
- 4 Filtration device
- 5 Germicidal light
- 6 Indoor coil
- 7 Humidifier
- 8 HEPA bypass filtration system
- 9 Energy recovery ventilator
- 10 Supply duct
- 11 Return duct
- 12 Dehumidifier system
- 13 Residential generator

CUSTOMIZE YOUR COMFORT

Lennox® heating, cooling and indoor air quality products are designed to provide efficient, economical comfort—not only as individual units, but also together as an integrated system. This combined network of products delivers on every comfort count, from consistent temperatures and balanced humidity to improved indoor air quality. Lennox also offers a line of residential generators, which provide safe, reliable standby power in the event of outages.

DEALERS YOU CAN COUNT ON

Choosing the right dealer for your home’s heating, cooling and air quality needs is every bit as important as choosing the right brand. We think you’ll agree our independent dealers are a big reason you can count on quality customer service whenever you call. Your Lennox dealer’s dedication to quality shows in his knowledge, training and expertise in designing the right system for your home, installing it properly and keeping it running perfectly for many years to come.
